

Vectograms®

Polarized vectograms ensure testing and training at actual distances. Vectograms stabilize fusion and stereopsis, eliminate and control suppression and fixation disparity. Available in fixed or variable styles to accommodate unlimited base-in and base-out training.

They are available in fixed or variable styles to accommodate unlimited base-in and base-out training. Used in monocular, binocular, pursuit and saccadic training, vectograms help correct and prevent anomalies involving projection and hand-eye coordination.
